Result Report — DSML | cse

## Student information

|              |            |            |                  |
|--------------|------------|------------|------------------|
| Student name | deepak     | Subject    | DSML             |
| Roll number  | 19         | Class      | diploma          |
| Phone        | 8808820451 | Exam date  | 19 April 2026    |
| Teacher      | admin      | Paper code | DSM-diploma-2026 |

## Score summary

|               |              |          |             |
|---------------|--------------|----------|-------------|
| <b>3.0/18</b> | <b>16.7%</b> | <b>F</b> | <b>Fail</b> |
| Total score   | Percentage   | Grade    | Result      |

## Question-wise marks

| Q# | Type        | Question                                                          | Max | Given      |
|----|-------------|-------------------------------------------------------------------|-----|------------|
| Q1 | Long Answer | What are the needs and application of AI and Data Science?        | 5   | <b>1.5</b> |
| Q2 | Long Answer | Comparison of Supervised, Unsupervised and Reinforcement Learning | 5   | <b>1.0</b> |
| Q3 | Long Answer | What are the goals of supervised and semi-supervised learning?    | 5   | <b>0.0</b> |
| Q4 | Long Answer | Applications of Artificial Intelligence                           | 3   | <b>0.5</b> |

## AI feedback — question wise

### Q1 (Long Answer): What are the needs and application of AI and Data Science?

Keywords missing: - data growth - decision making - automation - personalization - prediction - forecasting - competitive edge

### Q2 (Long Answer): Comparison of Supervised, Unsupervised and Reinforcement Learning

Keywords missing: - labeled data - unlabeled data - supervised - unsupervised - reinforcement - reward - penalty - feedback - trial and error - classification - patterns

### Q3 (Long Answer): What are the goals of supervised and semi-supervised learning?

Keywords missing: - semi-supervised - supervised - labeled data - unlabeled data - reduce cost - mapping - input - output - accuracy - reliability - unseen data

### Q4 (Long Answer): Applications of Artificial Intelligence

Keywords missing: - healthcare - finance - retail - transportation - education - agriculture - diagnosis - fraud detection - recommendation - self driving - tutoring - crop monitoring
